One of our tenants at 2825 Eastlake, AIMS Institute, emailed us to ask if we would allow them to test their patients for COVID-19 in an outdoor area on the property that is adjacent to their office. They said they would shield the area with screens. There are multiple tenants who work at this property and it is a standard office, not lab or medical building. We have contacted Washington State Department of Health and King County Department of Health to find out what the safety regulations, requirements and restrictions for COVID-19 testing sites. We assume COVID-19 test sites would be required to obtain a state regulated permit in order to set up a test site. We do not want to violate any state regulations by allowing the tenant to open a test site on our property, nor do we want to risk potential exposure to our tenants, visitors or staff. We would appreciate WA State DOH's guidance on COVID-19 testing site regulations. Thank you, Tara Raymond	tara@blumecompany.com	Tara Raymond	2068510299

04/07/20 4:36 PM	Nathan Kresse	L&I DOSH	Business function performed	Other	Apartment Buildings	Alley 24	224 Pontius Ave North	Seattle	I wrote previously about some of the egregious violations of the Governors order. The issues here are becoming even worse. Today they had gas powered leafblowers out blowing around dust and dirt and whatever else around all the apartments. They do this every Wednesday like clockwork. Because I live with a person that has respiratory issues, we had to race around the apartment putting wet towels under doors and in the windows. None of the 3-5 daily staff for this one leasing office, for one apartment complex seems to take any of this seriously or care for the residents here. None of these completely unnecessary staff are taking this seriously. There is no social distancing, nobody wearing masks or basic coverings, nobody wearing gloves, and nobody is cleaning any common areas or even just door handles. We have learned also that at least 2 people in the apartment complex definitely have COVID-19 and the building is taking no precautions. Please help!!!		I would prefer to remain anonymous. This management company seems increasingly hostile to our pleas and indifferent to the seriousness of this epidemic.

Many maintenance staff clustered together walking around residential areas without masks or gloves performing non-essential services yet residents were notified that no repairs would be made unless it was an absolute emergency, any other issue they told residents to perform themselves and they would talk us through it over the phone. I can't even get my prescription medications and paycheck from my mailbox without risking the health of myself and my family. The common mail room is in the management office building and all these extra people are constantly walking in and out of the building and congregating in front of the doorway. No social distancing is being practiced with any of these workers. Thank for your time and attention to this serious matter.		Mandy J

04/07/20 4:22 PM	covid19complaints@ini.wa.g	L&I	Business function performed	Construction		Alley24	224 Pontius Ave North	Seattle	Hello. I wrote a complaint yesterday about an apartment building continuing with apartment renovations and bringing a large amount of contractors for painting and carpet cleaning into the building for absolutely NOT essential work. Today they have more painting in some units and I've seen new workers that I assume are installing lighting or some new electrical equipment. I found out from a neighbor that there are people self-quarantining in the building that have coronavirus. This is insane and I feel that I am in danger. Please stop this. The company I work for shut down immediately after the mandate started but almost all of our competitor landscape companies never stopped and have continued to disregard the Mandate. This has put us at great disadvantage by following the law when others take advantage of law abiding companies. These companies are telling clients that they have special essential service certification and that is false. Our clients are ready to terminate us and go to the law breakers for service at this time and we are also losing employees to them. If elected officials don't think they should follow the essential business rules why would anyone else. If Councilman Brad Beauchamp is continuing on this job site who knows what he is doing elsewhere that is putting his constituents and the Community at higher risk. This is flagrant violation.

								Construction crews are still working on 2 brand new apartment buildings. They are laying concrete, putting in windows and doors and roofing materials. These crews are not essential and are not following social distancing. I have photo evidence as proof of this.					
								When I ask the crew why they are still working, I am told these rules don't apply to them because the owner/boss of BMB Development is a City Councilman. Please help. The workers are taking breaks all together on my fence (hanging/leaning) to where I can't even let my young children out to play for fear. Are children are essentially held hostage inside our own home, due to these workers not following the rules.					
								I was also informed by one of the construction workers that they are not supposed to be working, but they didn't care and need the money and are allowed to continue. They also stated that if the owner gets caught again he might get fined, but it would be worth the fine as the projects are more important than some little fine. The worker informed me that they are working at more than these 2 construction sites.

03/31/20 9:13 AM		Essential Business	Business function performed	Other	Rv sales department camping world	Camping world pasco	9420 sandfur pkwy	Pasco	People are out shopping for recreational vehicles when a stay at home order is in place. The social distancing is and can't be enforced from the test drive to the showing and the presentation of the RV in a closed environment. The close contact a sales associate has to make and the finance department having to be in a closed room 2 to 3 feet apart singing documents is unrealistic. This makes the governor's stay at home order pointless. Therefore, people are becoming bored and going RV shopping, despite the severity of this virus, putting not only themselves in harms way, but the employees who are are forced to go to work. I do understand that the parts and service department need to stay open, but the RV sales have no logical reason to stay open. If this order is not enforced, then people will continue to disobey the governor's order and will continue to shop, therefore jeopardizing everyone involved. This will also create a continuance of a longer potential lockdown. I do not see recreational sales on the governor's essentials list. Please enforce this so we can get life back to normal again. Thanks I hate to send things like this but after seeing this in person its pointless to impose this if rules are not followed.	Sbrn_nmwm@yahoo.com	Jane	5098519166

This creates a close sale environment as well as spreading of potential contaminated items and is very concerning. My company does not seem to be taking this order seriously and it is giving a lot of the employees extreme anxiety.

04/01/20 5:00 PM		Essential Business	Business function performed	Other	Pawn Shop	Cash America Pawn	12025 Hwy 99 A Everett	Hello, I am sending this report to inform you of Cash America Pawn Shops poor leading skills in informing their employees of what new positions we take on during the stay at home orders. As of today, I have not been given a straight answer of whether if we are supposed to sell as retail or just do pawn, loans, layaways, and buys. The district manager, Jacob, seems to be in a struggle with the state and Corporate and is not giving our manager and us employe an answer. The company seems to be lacking in enforcing our district manager of the true nature of being a financial institution and what new guidelines we have to follow. Under CDC law, we are only allowed to sell essential items and provide essential needs, like pawns, loans, and letting customers retrieve their pawned items, being labeled as a financial institution now. Yet during a meeting on Wednesday, 04/01/2020, Jacob (district manager of the king county of Seattle for Cash America Pawn) could not give us a straight answer to if we should just attend to the customer's needs and nothing more. Saying that we should sell things on the side if we can, but to shoo away the customers when people in need come in. He could not even say the word "deter" or "tell them to leave" that we need to look like nothing is going on and that they feel no urgency to follow the guide lines. The company is still encouraging use to make the numbers each month and to sell our goods ranging from jewelry, movies, games, electronics, and other Is a pawn shop really considered essential? I want to abide by the Stay home, stay healthy order and yet the only way to not lose my stuff is by leaving my house and going to this establishment. It should not be open or it should be required to provide an online option to pay.	maribelcruz1@gmail.com	Maribel Cruz	4255836870

This work can be performed in the home setting/telework, as the functions of these roles are not essential to COVID-19. Per CDC guidelines mask are being used for all staff coming into the hospital, which is waiting supplies for essential health care staff! Roles of staff that aren't direct patient care or support (house keeping, dietary) are mandated to report daily. The FAC is for financial support and are mandated to report daily too. An employee has tested positive and are subjecting thousands of people and their families to COVID 19 which is going to continue to expose citizens because of the day to day travel & needs for gas etc. The daily travel for non-essential staff is increasing portals of transmission. Human Resources functions through telephone and email support to leaders, they don't provide ANY direct patient support in response to COVID-19. Why are these citizens in non-essential roles being mandated under a clause because they work for a hospital?

Therefore, construction continues on these projects. By scheduling inspections, the City of Redmond is facilitating these nonessential construction activities. By conducting these inspections, the City is defying the order. These inspections result in construction workers' violating social distancing guidelines by capping to the construction site as well as by working together at the site. We also have a commercial project going for them that we cannot get material for due to COVID 19 and they are now going to charge us legislated damages starting on the 5th of May of \$1,800 per day. We have requested time extension with a response of no. I filled out an inclusion for this project on the website and received a response that we could continue until the building was safe to enter and free of spoilage. The mayor of Selah sent us a letter after your response that she feels the project is essential so we have continued to work on the project as materials show up. My wife drove by yesterday and noticed six cars lined up. Unlike restaurant take away or delivery where there is social distancing and you can take precautionary measures once you get home, with driveup espresso there is face to face contact and then immediate consumption of the commodity while holding a possibly contaminated container. Besides, how essential is convenient coffee? I fear that one sick barista could seed a major outbreak in our small town. They have been told to figure out their own social distancing because "they are adults and can figure it out". They have been told they are essential, with no clarification, yet cannot perform their normal jobs. When they could allow employees to work from home, they instead put them in an office with an "are you happy now" attitude. They sent an employee today to an elderly woman's home to obtain signatures. They have spoken of buying a property to flip by using their Weatherization employees to do the work, at their base wage - when they are typically paid alternative wages for their Weatherization work. This would mean they are profiting off of their employees while not having to pay them as they typically would when they are doing Weatherization work. While this has not yet happened, this is how the leadership is talking and dealing with their staff that are scared, asthmatic, have families and elderly relatives. Why is this essential or necessary? Can we provide Technical assistance and education on this crisis to these community based organizations who can send non-essential staff home to be safe or easily promote work from home opportunity to serve their client base from home- especially in cases of reception work, etc? 								I am reporting a Construction business. The construction business is continuing operations and ignoring stay at home orders when they are a non essential business based on what I see on TV. I called the Construction Manager, Jeff Hill at 206 419 1586 and inquired why they were working when there is a stay at home order and his workers are not 6 feet apart. Jeff said because he can and he has permission. Jeff denied they were not less than 6 feet apart. I offered photos and he declined. This construction site is 500 FEET OR LESS from a VA HOSPITAL type setting with HIGHLY DEPENDENT ELDERLY ADULTS. I have photos of the workers who are NOT 6 feet apart. I took various photos on different days because this could turn into a he said she said. I notified Orting Mayor Josh Penner. Mayor Penner responded to my first email dated 03/31/2020 stating his understanding was that the work was being done to close up the ground on recently installed utilities. He also stated his guess is that transitional housing will be exempt. The response made sense to me at the time however I believed the work would be temporary for the sole purpose of protecting their assets/liabilities. I was not aware they would be working same as always on an ongoing basis and today is 04/14/2020. My additional emails to Mayor Josh Penner voicing concern with photos of the workers who are NOT 6 feet apart have not been responded to. I guess I am on ignore. I also called the VA Hospital/Vulnerable Adult Care onsite management team. The management team heard my concerns and stated Contractor is working on a new school Addition, how is this addition essential if the students are not in school? The school operated without this building before this project started and continued to operate up until COVID-19 shutdown. A delay in schedule does not stop the start of school. Parkland	Gravity Coffee Company has had ongoing construction on this new store. Today, they have concrete trucks and other various construction trucks out digging up the Starbucks parking lot. They have not halted construction at all. I have seen them working on it nearly everyday and evening that I have driven past this location in the past weeks. They currently have a group of men standing by the trucks-not socially distanced at all. I just went over and asked the Starbucks employees what was going on, and they said that they have reported them several times to local law enforcement. Can we get some help out here, in a county that has a high number of COVID-19 cases, as Gravity Coffee seeks to exploit an environment where the law enforcement is over-worked and unavailable. I have written in a couple times about the owner having us sell puppies during this time. All employees including myself feel as if the owner should not be selling puppies, we have even told her we aren't comfortable and she doesn't care. The owner makes us tell customers over the phone we are not selling, but if someone comes in we tell them we are. I told her we aren't comfortable lying, and she told me it didn't matter. Employees everywhere including here are grateful to have a job, and this puts us in a tough situation. She is being very sneaky about what is happening here at the store. If the selling of puppies, that come from a breeder (not ones that are abandoned or found on the street) isn't allowed, she needs more than an email stating so. She has said that directly to me. I have written in anonymously, and would like to stay anonymous as far as my employer is concerned. I will however leave my information below to be contacted about this situation. There are a lot of concerns as employees have and if those concerns could be addressed and we are at an understanding of what we are allowed to do it would be greatly appreciated.	kelsie48edwards@gmail.com Kelsie Clark	(307) 212-2230	request@fairwoodpetcenter.com

Owner has gotten an email stating that complaints have been made, but is still being very sneaky about the selling of puppies. When you call on the phone she has the employees say we aren't selling them, even though she has been told this makes us uncomfortable because we are in fact still selling. The owner makes sure that you are for sure 100% a buyer and not an "activist." This seems very fishy, why say we aren't selling over the phone if we are allowed to be selling? Every employee feels the selling of puppies is non-essential. These puppies come from breeders, these breeders don't really need us to be selling right now, but because the owner needs the money she is still bringing puppies in. When we sell a puppy it's very hard to keep social distancing to a minimum. This has been on going sense the lockdown has happened. I feel that a simple email isn't going to do the trick. She is very good with words and is very sneaky with what she's doing here.			request@fairwoodpetcenter.com

As an employee I can guarantee you that the majority of business done here is that of selling animals and not supplies. When selling an animal you have to go over a lengthy contact, this takes up almost an hour being around a customer, and it's almost impossible to be 6 feet away to do this, all this happening while other customers are coming and going. This business is also still allowing grooming to be done, although the owner has been shown an email stating it's not allowed from another grooming business. I've owned horses for 30 years, and in my mind, this is far from essential, and can spread germs from one home/stable to another. The farrier ahs contact with the horse owner. Horse scan go up to 3 months without being trimmed, and they are fine. The address included is fictional to submit the form. I want to know if farriers are allowed to continue working. 04/14/20 12:54 PM	No Agency	Business function performed	Other	Non essential retail	Fed ex office	Tacoma	Tacoma	I am a hospital worker that ships medical supplies and was extremely bothered when I went into a FedEx office location in Tacoma Washington. They are offering non-essential printing services, they have copy machines and fax machines that are open to the public and there was person after person coming in using the copy machine one after the other. It was absolutely disgusting the poor employees are so overwhelmed. I felt horrible for them, just as I was standing there doing my shipment there were people coming in to do paper shredding! How is paper shredding in an essential service? There were people coming in to make copies of personal photographs! How is that an essential service? People are coming into FedEx office for non-essential things. FedEx is refusing to abide by what is essential and what is non-essential. The only thing they should be offering is shipping as someone that works in the healthcare field I am appalled by the amount of people that were in there for non-essential business and that FedEx is allowing this to happen! The majority of the people that were coming in did not know how to use the copy machine or the fax machine forcing the employees to help them it is not possible to maintain a 6-foot distance and show somebody how to use a copy machine or a fax machine. People are coming in for absolutely non-essential printing! People are not staying home despite whats being reported in the media. We have had dozens of people today come in to make photocopies of things that are absolutely unimportant because they're bored and want to work on art projects. We have complained to the health department, we've listened to us and nobody is protecting us! It is putting the neighborhood at risk because there is no way to avoid them since it is a one way road. At times where nobody needs another gas station. Private residential construction resumed yesterday, 4/13/20, even though there is still a stay at home order. They began erecting walls and framing a structure that was not yet erected. They have returned again today 4/14/20. Group of about 8 workers, not donning masks or practicing social distancing. I am a health care worker and this is on my residential block. The blatant disregard for the safety of others and following the law is inexcusable. Those of us who have had to agree to help with covid swabbing and assist with care do so because of groups like this one...apparently they can disregard the order AND not don face protection AND not social distance on site. 04/01/20 10:37 AM	Nathan Kresse	L&I DOSH	Business function performed	Landlord		Greystar	800 5th Ave	Seattle	Our regional manager at Greystar has instructed our service team to do non-urgent work orders, such as changing light bulbs, because she doesn't want non-urgent issues to "pile up." I have this in writing. Our company has instructed our service teams to only complete urgent work orders. Forcing our team to do unnecessary work orders not only exposes our team members but also means that they will be going in and out of more apartments, potentially spreading the virus around the building. Greystar itself has discouraged our service team from wearing masks and gloves as well. (I have the recorded conference call.) In addition, our leasing (sales) team and admin staff have been instructed to come into the office 4 days a week (overlapping with other office staff) and to keep the office open to residents. This is completely unnecessary because, now that we don't give live apt tours, we do 100% of our jobs on the computer. So every day we come into the office and sit at a computer, which we could do from home and keep everyone safer. Please help. Our regional manager has said that the virus isn't a big deal and that if one of us gets sick, it's okay because we could just call in an employee from another property to take our place. She definitely would not close the office or send the team (all of whom have overlapped schedules with every single other team member) home to self-quarantine for 14 days if someone were to get sick.	elisabeth.sutton@gmail.com	Elisabeth Sutton	360-909-7581

									Below this I have copy and pasted an email from my landlord. This "Notice of Entry" goes against the Stay at Home order. I was upset at the disregard for the safety of our building from our landlord. How is this walk through considered "Essential business"? I denied her entry and that was respected. But this seems like a terrible idea!				
									This is official notice that I will be coming by to walk through all of the apartments in the building on Thursday 5/14/20 between 11:00am -12:00pm. I don't know the property well and since I took over management it would be nice to see them. I will also take some video for my preleasing efforts while I'm there. It will just be me. I will take precautions with a mask and possibly gloves. I'll try not to touch anything. Please let me know if any of you have a problem with that. I will respect your wishes at this time.

He was Not given either RT-PCR nor serology tests prior to the procedure date. The only questions he claimed to have been asked on 4/17/20 were whether he had traveled abroad or if he had been in contact with any one with covid19 symptoms (substandard!). When I asked the masked nurses at the entrance that day if they'd had any covid patients at all, they said they could not discuss that (no transparency to the public). I have great concern for vulnerable adults who "trust the system/doctors" without questioning the safety and environment. I understand that the hospitals are trying to make wise decisions, but Gov. Inslee's office is still working on protocols to allow elective surgeries to eventually resume...although it seems some have, as in this case. The Canadian Government requires testing and results prior to procedures/surgeries before they will open up elective surgeries. We need to! And we need transparency of all hospitals and care facilities throughout the state regarding cases, deaths, protocols around safety issues and steps being taken as they evolve. Transparency and testing are crucial (ie, signage at the entrances explaining some info, website info, etc.) Thank you for looking into this on behalf of all elders, their families and caregivers, as well as WA citizens.	aurora9449@gmail.com	Sarah Hart	914-602-3388

They've since started several private residential jobs. On top of this, there are zero precautions being made with cleaning, etc. The bathroom is cleaned twice a week. That is the entire regimen. Everyone handles everything in the shop, and passes it down the line. There are residents of at least 11 different Washington towns that work there. No proof of being officially essential has been provided, and several jobs being done are certainly not essential. I WOULD LIKE TO REMAIN ANONYMOUS!!! I want to keep my job. I-5 TOYOTA	1950 NW Louisiana Ave	Chehalis	The sales floor is closed but one can assume because auto repair is listed as essential they are still working the auto detailers too. You have to drive around to the side of the building to see the detailing space on back corner of building. This is putting these young people at risk of contracting this highly contagious virus from it being on the insides of the vehicle surfaces that are being cleaned. When two detailers are working on one vehicle there is no way to keep a 6' distance. They are working alongside one another. They wear their personal clothes that they have crawled around within the potentially infected cars in thru an 8-hr shift and then wear them home potentially spreading it to other members of their families. Behavioral health is on the essential list, but behavioral health includes mental health and substance abuse treatment, which ABA is not. I put my health, and my family's health, at risk by not questioning him. In my head I was only thinking about ME not putting HIM at risk, not the other way around! He looked under my deck and called me over to look NEXT to him to show me that my beams were strong and safe, and neither of us was wearing a mask! 04/01/20 10:07 AM		Essential Business	Business function performed	Health-related business	Kaiser Permanente	1300 SW 27th St. Renton, V	Renton	Administrative personnel (patient schedulers) that work in Kaiser offices work on the phone setting up appointments for patients. This effort can be done at home if Kaiser had gotten off the dime and put these practices into implementation. They (the patient scheduler employees) are still going into the office every day and therefore incur increased risk of exposure. I don't even work for Kaiser. I work for Boeing and we've been working from home for over a month. 04/30/20 7:22 PM	Nathan Kresse	L&I DOSH	Business function performed	Health-related business		Kaiser Permanente of Washington	201 16th Ave. E	Seattle	The Governor's order is in place thru 5/4, however, we were told today that we were doing a "soft opening" on that day. One big issue is waiting areas are not large enough to social distance patients. I work in a primarily yearly routine screening department. We have continued to see patients on an urgent basis that present with symptoms and we do have PPE. However, employees are concerned that bringing elderly screening patients into facilities will violate the Governor's order and potentially expose patients and HCW. Management made this decision without consulting the Union and did not include workers. We repeatedly are denied COVID 19 testing even though the Governor's orders states HCW should have access to testing. We all know now that COVID 19 can spread through simple breathing and when asymptomatic. Who do we listen to? The Governor or a group of middle managers? 03/31/20 12:06 AM	Nathan Kresse	L&I DOSH	Business function performed	Other	501c3 retirement organization	Mirabella retirement community	116 Fairview Ave N	Seattle	I work in dining services as a bartender at mirabella retirement community. I also work at two other bars. Before the mandatory shutdown of restaurants and bars, I was exposed to hundreds of people who were told to quarantine because someone at their office was tested positive for Covid. I felt it was dangerous to go into work at the retirement home based on this knowledge, especially since the dine in services were shut down and my job as bartender became non essential. I asked for a sick day due to mental health as the anxiety of endangering an at risk population was traumatizing. HR refused to put the best interest of the residents and said I was need to perform other tasks. Such as cleaning (which the facilities department handles). Due to their irresponsibility in effectively having a strategic and effective plan prioritizing resident health over their finances, there has been a resident who tested positive for Covid-19. There are employees who have been asked to quarantine due to symptoms hanging out with employees outside with minimal efforts to flatten the curve. How a retirement community continues to put their financial loss before the residents they are supposed to protect is appalling and needs to be investigated. No one should go in to do busy work around a fragile population so that a non profit can avoid paying unemployment. Please investigate.	nikolic2@gmail.com	Tanja Nikolic	6822402703

The Wilson building is primarily used by the public to store boats and RVs (a monthly rental fee is charged). Other than being used to storage private property, the building has limited public use. This construction project will take weeks to complete and will involve numerous employees. There is not an immediate need for this construction "to prevent spoilation and avoid damage or unsafe conditions". The construction could easily be delayed until after the COVID-19 order is lifted. He first informed that he will be closing and they can collect unemployment. Then he changed his mind that they have to work and if they don't work, they will get fired. Now, one of his employees have indicated that he may have the Virus and he was told not to get tested. This employee is not working because he is sick. Now, I have heard a couple of workers may have been infected. I am very concerned that because if this continues and staff that maybe infected and not know about it is scared not to come to work because they have been told they cant stay home or they will get fired. Unless, this matter is taken care of, I am afraid that the Virus will continue to spread. I feel for these staff because I know it is important for them to have a job. 04/03/20 2:28 PM	Essential Business	Business function performed	Other	Bike shop	Old town bicycle	420 capitol way s	Olympia 98501	Please order this shop closed!!! For some reason bike shops got on the essential list but I can assure they are not. People are coming in because they are bored and want their bikes tuned up or their kids are off school so they are going to buy them bikes. These greedy owners are putting their hardworking, loyal employees lives on line just to make a buck. These employees have been asked to conserve cleaning products, have no protective gear, and have to perform functions like fitting the bikes to the customers which requires them be right next to the person!!! Please reconsider having these shops essential because I can tell you they most certainly are not. This shop being open is an unnecessary risk of these employees lives. Dr McCabe claims "he's saving lives by diagnosing cancer" by performing ELECTIVE & NON-EMERGENCY colonoscopies, endoscopies, swallowing studies, etc in an outpatient procedure center and not in a hospital setting. Not only is he putting several of his patients lives at risk, but also all of his support nursing & technical staff! He is only interested in maintaining a profit and not reducing the potential spread of Covid-19! On top of that, he is risking the lives of our First Responders & Healthcare Workers who desperately need personal protective equipment during this shortage. Dr McCabe has STOCKPILES of gloves, masks, face shields & gowns that he uses for his elective procedures (I used to work as an RN at that clinic so I know from personal experience & have heard from current staff members that are forced to work at his clinic despite their fear & concern about potentially getting infected.) He needs to be stopped and held accountable for his intentional violation of the emergency proclamation & stop endangering the public health. In fact, all of his stockpiles of PPE should be confiscated & donated to the frontlines for those who need it the most! Summary: -Building management is forcing tenants to accept that they must enter their apartments to upgrade cabinets during the pandemic. This is a new construction which was not started previously.- These upgrades are non-essential and none of the residents have requested them. Everything is functioning fine in the apartments and there is no urgency. The residents were not informed of this in the past. -Workers are conducting work in 200 to 300 sq. ft. studios/kitchens where there is no ventilation. Workers are in an enclosed area less than 6 feet away from tenants for multiple-days.-Bathroom access is through the kitchen meaning that there will be direct exposure to potential COVID virus and inability to keep distance from the workers and all This company has been performing normal landscape maintenance services that are not an essential business category. They are using the wording of spoliation as there reasoning for staying open and illegally working mowing grass, edging, pruning etc that are not an essential service. The company I work for has been shut down every day since the mandate came out and our clients and employees are complaining to us about why we are shut down following the rules when the other big companies are not. This company has been providing landscape maintenance since the mandate started. They are out mowing, edging, pruning etc and breaking the law. We are a landscape company and have laid off our employees and they along with our clients are asking us why we are not servicing the properties while all these other landscape companies are out doing this work. I have pictures of numerous companies employees out performing non essential work. On 4/7 they were out doing landscape maintenance which is not an essential business. Company has been out performing mowing, edging, weeding and other non-essential services as stated by the mandate. The company I work for shut down immediately after the mandate started but almost all of our competitor landscape companies never stopped and have continued to disregard the Mandate. This has put us at great disadvantage by following the law when others take advantage of law abiding companies. These companies are telling clients that they have special essential service certification and that is false. Our clients are ready to terminate us and go to the law breakers for service at this time and we are also loosing employees to them. 04/21/20 11:29 AM	No Agency	Business function performed	Other	Boat repair	Platypus Marine Inc	102 N Cedar Street	Port Angeles	Platypus Marine Inc has been operating in a grey area during the duration of the stay at home order. They have gone out of their way to say they are essential. Yes, they are working on a couple of navy barges but they are not very needed/used and there is no deadline coming up so there is no reason they can't wait a few weeks. Majority of their employees are not working on those barges, therefore they are doing non essential and mostly just busy work. This has been going on since the start of the stay at home order. They were doing split shifts of one week on and one week off in an attempt to comply with social distancing. They have decided to stop doing that now. They said they would provide mask for employees, they handed them a couple of bandanas. They are going out of their way to find things for employees to do as they dont have much work at the moment and only a few people are actually working on the barges. This has resulted in employees doing inane tasks such as cleaning gravel, washing the parking lot and buildings and now painting the buildings. Non of which is what the employees were hired to do and definitely non of it is essential. It's very frustrating to the employees and their families that Platypus has so little disregard for their health and well being and feels the need to risk it for such pointless tasks. Any help/clarification about this situation would be greatly appreciated.	taraprice42@gmail.com	Tara	3608085983	paula@platypusmarine.com	
03/31/20 12:26 PM	Nathan Kresse	L&I DOSH	Business function performed	Other	Boat repair	Platypus Marine Inc	102 N Cedar ST	Port Angeles	The higher ups at Platypus Marine Inc are letting their political beliefs cloud their judgement and they are not taking COVID-19 seriously. They constantly make jokes and dismiss how serious it is, so who knows if they're maintaining social distancing or proper hygiene. They have gone out of their way to find any reason they might be remotely essential even though all the other boat repair shops in the area have closed. Platypus is saying they are essential because they just started working on a couple navy barges. The barges haven't been used for years so I'm not sure how they are essential. They're using the barges as an excuse to stay open and they continue to work on every non essential boat they have and go about as if nothing is happening. Their employees and families, as well as the city port, are upset because it does not seem necessary for them to remain open. It makes it even more difficult to keep our families safe if our loved ones are still being forced to go to work for something that isn't essential at this current time. They obviously care more about money than the well being of their employees or community.	Carynsullivan85@hotmail.com	Caryn	3608085983	paula@platypusmarine.com

The purpose is to install a new, redundant high-voltage power line. While electricity is essential for running basic services, this particular project will not provide electricity to any safety or health facilities. It is intended only to provide power to residents in a very rare scenario that has happened only twice in the past 13 years. The workers are not able to maintain social distancing while doing their jobs. We observed numerous violations during a 5-minute period. For the sake of the workers and the community, this project should be paused. It doesn't even meet PSE's own COVID-19 response policy as posted on the company website. No more essential than a hair cut. They are still offering to come give estimates to clean your house and then to clean it. They are going from one residence to another and taking their equipment from one place to another. This is putting people in their residence at risk as well as their employees need to get gas for work etc. I though the list of essential only included janitorial services to clean essential open businesses not someones regular house cleaning. This is not a essential service when other small businesses are being asked to shut down without pay. If Boeing is non-essential than certainly having your house cleaned is. This is not the cleaning of essential businesses this is the cleaning of someones house! That is a luxury not essential!				Judi@redsparkling.com

It is concerning because it is difficult to understand how employees will be able to maintain social distancing when they have to work in such small confined spaces as a recreational fishing boat. Four days later the company we work for Rich's For The Home called us up and said we need to come back to work to do "projects and busy work". They said we can stay home but they will not keep us on standby and continue to pay. So in order to keep our job and get paid we have to risk ours and the community's health. The weekend the stay at home was enacted the store had a huge crowd, people didn't care about social distancing at all and it is not enforced at our place of work. The company claims they brought us back to keep us paid but I made enough on standby and simply want to comply with the government and work together to make the virus go away. While Rich's for the home does have fireplace techs, there is only 2 and they are 70+ and shouldn't be there either. It feels the rest of us were brought back to do pointless work. Don't know if it on purpose or just their not knowing but they twisted the rules to meet their needs and tell people it is a service business. They are saying it is okay to divide into groups of 5. This is from the email sent to parents, "We are planning to schedule practices in a way that allows for two groups on the field (separated onto the halves of the field), and one is inside." This is the latest thing that doesn't go with what you want. Some players and family members work out at the facility during the stay at home order. Many times this was people who are not in the same family. There has been a personal trainer who uses the gym seeing his clients. Now that there is that disease kids get this doesn't seem smart to get them together so quick. The coaches are not gonna keep kids from getting close cuz they just talk about how they need to play. Just thought you should know cuz this doesn't seem like phase 1 or 2 stuff.

There will be a new modified sign to that effect posted at the gatehouse. The club will provide personnel at the gatehouse who will hand out flyers advising all outside pedestrians and cyclists attempting to come in from 7am - 4pm the neighborhood is temporarily closed. Our current security guards will adjust their hours to 4pm to 12 midnight during this closure and will also have flyers to hand out. This final phase includes heavy construction vehicles moving between Lakemont and Fairway carrying loads of bunker sand and sod. The sole purpose of the outer loop being closed is to keep all of our residents safe. We will reopen the outer loop when the construction is complete. Due to the golf course construction, Lakemont and Fairway will be closed to ALL pedestrians and cyclists including residents. PLEASE STAY OFF THE OUTER LOOP UNTIL CONSTRUCTION IS COMPLETED AS THIS IS A SAFETY ISSUE.				spcchoa@gmail.com
04/12/20 10:22 PM	covid19complaints@ini.wa.g	L&I	Business function performed	Construction		Sand Point Country Club Golf Course	8333 55th Ave NE Seattle	Golf course construction ongoing. Massive construction begins tomorrow 4/13. They are closing all of our roads because of construction (no sidewalks here)so we can't even walk the neighborhood. Golf course construction is NOT essential. If Sound Transit construction is shut down, and my lawn guys can't come, how can they build a golf course? Renovation work on the golf course at Sand Point has never stopped during the Governor's proclamation. Recently, the Sand Point homeowners assoc. has shut the neighborhood down to non-residents while requesting that residents stay off the outer drive by the course so that the contractor's heavy equipment can move about freely in their effort to finish the construction project. New equipment moved in over the weekend as the next phase appears to be hauling sand around to fill all of the bunkers on the course. This is a neighborhood in which many people walk and children ride bikes. With most everyone home during this time, this construction work would appear to not only violate the Governor's proclamation in terms of the virus, it may also prove unsafe in general to others that are abiding by the order.	deb@tratt.com	Deborah Rappaport	12069313727

If they weren't able to have adequate supplies pre pandemic what makes you think they will have it now when it is in such short supply? Seattle Surgery Center is run by Prolance Surgeons - a for profit company who has one thing in mind. MAKING MONEY. They have admitted to employees they have absolutely no "rainy day fund" and continued to perform non-elective surgeries despite being ordered not to. Here is an excerpt that was received by employees yesterday 5/1/2020: *The challenge we currently face is operational. While lab testing is available, specimen swabs and viral transport media are not yet (or at least not reliably in large quantities). Also significantly problematic is the fact that at this time, no outside labs (including our affiliated hospitals) are willing to actually collect the specimens from our patients. Therefore, all specimen collection would need to be done on site by Prolance teammates, and then transported to a lab to run the test. We have significant concerns regarding the proper training of our teammates, the need for a dedicated room or area for testing, use of PPE for each test, and the safety of that process in general. That behavior is already unacceptable but THEY SENT AN EMAIL OUT SOLICITING BUSINESS DIRECTLY AGAINST THE GOVERNOR'S EDICTS! You really think in a town of less than 1300 people someone, or a relative of someone, isn't going to be on a mass email list and then talk about it? Threatening people when your OWN ACTIONS made the community aware of your irresponsibility isn't just immoral and disgusting; it's epically stupid. They had rent a fence surrounding their site until the day that you announced that you were going to shut down construction and they had half of it removed. They then need to secure the site I understand. The problem is they have a guy from coast out trying to put a fence up to secure...but they are also have trucks bringing in dirt and rock that have nothing to do with securing the site. Today they had bulldozers and trucks in working that is nowhere near the fence. I believe they are using securing the site as an excuse to keep on working. First the lied and claimed that nobody was working, when told we would call the police because people had broken into empty units the "manager" said they had special approval from the governor to expose high risk patients. They are liars, they are intentionally violating this order making it impossible for a doctor and a nurse to self isolate to protect the community and also making it impossible for multiple high risk patients to isolate themselves. There is no broken pipe, there is no water leak, there is no urgent matter, they are opening spitting in the face of the governor's stay at home order risking people's lives. If these people get sick there is a very good chance they will die. I cannot give you my name. After they lied and said nobody was working, when they are and they lied and said it was essential they do work nobody wants done, they threatened people. These need to be told to stop. It is sad, but somebody needs to tell these there is a reason this order is in place. As the social distancing works, the numbers look good, people think they can do whatever they want. They cannot. They are risking other people lives in hopes they might be able to rent empty units. They know the work they are doing is against the law. They did not do the work for weeks, now all the sudden they need to have all kinds of strangers going in and out of apartment buildings all day every day. He was secretly cutting hair in his location all along and admits to doing so! I am pleased to see that the letter has been sent to him to cease operation. His business should have to adhere to the phases of re-opening just like the rest of the state. I understand the importance of making an income but he is in direct violation and it is truly disgraceful. Not surprising to learn his shop license expired more than three years ago. I've also lost my hope in the citizens who support this. They are requiring all staff to be on site in clinic starting Monday 5/4/2020. For the past 6 weeks, we have successfully implemented remote work all care of our staff and there are no barriers to continuing our 6 week remote work rotation. We were doing 2 weeks remote, 1 week in clinic. We are able to "open" and perform "elective surgeries" WITHOUT requiring all staff to be physically on site. CMS extended our ability to do virtual/tele-health appointments by 90 days so we can also continue this as an option for our patients, while still seeing the occasional patient physically in clinic. Our in-clinic patient volumes over the past 6 weeks do not reflect the need to have all staff on site. (dtyler@talleygrund.com; Mobile - 206.679.0945) business address: 1115 N. 97th Street, Seattle, WA 98103, has been in process of replacing siding and balconies on 50% (front and north side) of our 5 story condo building on east lake union waterfront since January of this year. They have the complete east and north sides of our building scaffolded and masked off with thick white opaque plastic for over 2 months now, for removing siding that includes asbestos and windows. They have now run into some engineering issues that have brought work on those two sides of the building to a halt, but want to accelerate scaffolding and bagging of the entire lake facing west side of the building where I live on the second floor. We were not expecting this work to start for a couple more months, per previously agreed to schedule, and do not want our fresh air supply through our windows and balcony door cutoff, and asbestos demolition work started, while two adults with underlying medical conditions and child home from school are working from home and sheltering in place from the COVID-19 virus. I wrote two letters, one to construction company and one to my HOA, but work on the scaffolding continues. Other neighbors in my building share my concerns about being put at health risk by added construction. We are ok with scaffolding by itself but want masking in plastic and demo work delayed until other construction is completed and we are able to go outside again. Their priority should be to complete construction they have already started, thus freeing up ventilation and This firm continues work on a construction project that has no urgency. Ash Street	Spokane	I believe this business is allowing "regulars" / friends of the owners, etc to still enter the establishment and gather. I believe they are serving alcohol to guests as well as the owners drinking on site during business hours as well. Through the grapevine I have heard that they are having their friends pay with cash and will then ring in the sales when businesses are allowed to reopen. Or, are not collecting a full payment at all. I know they are "open" and have posted their take out menu but it is my opinion that some folks are still gathering inside to socialize who aren't actually waiting on a to go food order. Either way, there shouldn't be any hard alcohol being served right? I believe in order to "sell" beer wine or liquor under the new rules and the normal liquor control board rules as well is that the bottles or growlers must be sold sealed and consumed off premis. It's a small place just taken over by new owners back in January and it's my opinion they are not following the Governors orders.		Anonymous		Alex Springer / Ethan Higa

Back office employees continue to work, not just the owner. Although the Needlepointer has closed it's doors to the public, the owner of the business has covered the windows of the establishment and is still having employees come in on their regular schedules in order to attend to their online orders. There are up to 8 employees in the shop at a time from Monday-Saturday, with at least half of them being in the risk group for COVID-19 due to age.				shop@theneedlepointer.com

04/14/20 2:51 PM	covid19complaints@ini.wa.g	L&I	Business function performed	Construction	Unknown	Hoh street	Lacey WA	Not complying with No Residential Construction. There is no threat of "spillage" in my opinion. The buildings/units have roofs, gutters, and are fully wrapped. I see them now doing siding, doors, windows. There are over 50 people there not practicing social distancing or using PPE masks. I understand this is my opinion but the weather is not a threat now or in the near future. So I don't see the urgency of bringing in 3 groups of contractors and their employees at the same time to put in windows, doors, and siding. There is no way this company can get these jobs complete in a short amount of time, considering the size of the buildings. Also need to take into consideration likely most of these employees do not reside in the local community and are from other places. So injecting over 50 people in one area, in our community, I see a higher risk of potential spread of covid-19 virus. I've watched this construction site for a year and since this stop order has been put into place, I have noticed an INCREASE in workers. Almost like they are grabbing workers from other sites. I do have video and still photos to prove these statements.		Mike Jenkins	13603496810

Seattle	Before the coronavirus epidemic, this neighborhood cafe used to be open for meals, with two outside picnic tables and some chairs. It switched to take-out food early on after inside dining was prohibited, and then closed all together. It is now open essentially as a store, selling mainly drinks, including coffee, bottles of wine and beer, and some baked goods. The outside tables and chairs are occupied with groups of people on the sidewalk in a residential area socializing together without masks. Today I passed groups of people drinking bottles of wine on the picnic table at 1:00 pm. I doubt seriously that everyone in the group lived in the same household; it looked like friends were getting together to socialize and drink. 								I find this completely inappropriate, as it pressures those who have had job security with minimum contact to actually go and serve people, therefore not being able to social distance properly. They will also be in direct contact with customers germs (dirty dishes), and if people are eating, they are not able to wear masks to minimize spread.					
								Some of those employees cannot afford to leave their job and wait weeks for unemployment. By pressuring them in this manner and working closer with the public, it not only puts themselves at risk, but also anyone they come into contact with as well. Please, consider putting an end to this and reaching out to Kartak, as this behavior goes against the laws in place by governor Insee, as well as the letter that Kartak wrote with Jason Sanders (the Council President).					
								I would also hope that these businesses would not be forced to close, and could instead receive a warning. They do not deserve to lose their entire livelihood due to the Mayor's incompetence. Thank you, and hope everyone is well. Shannon

	04/14/20 1:41 PM	doh.information@doh.wa.gov	DOH	Restaurants serving dine-in	Restaurant or food service business	Whibey Doughnuts	5603 bayview rd	Langley	Doughnuts displayed in a manner to allow contamination by the general public. Resteraunt has been allowing dine in both inside seating as well as outside seating. Resteraunt has been violating the rules since the start if the state order and continues to do so. Island county health seems understaffed just performing routine inspections, let alone shutdown order enforcement.
