We are in close quarters and are not able to keep 6 feet apart at all times. In addition, many of my co-workers do not take the social distancing guidelines seriously and management is not enforcing them. Some of the managers are also not following social distancing guidelines. There are employees coming to work who are coughing and sneezing. The ventilation in the building is not good and we have long work days and heavy mail and package volumes which is physically very tiring and breaks down our general health. Could any of this be corrected? Ideas: less people in the building at once, managers instructing employees to stay separate or sending them home if they are coughing or sneezing, curtailing "junk mail" and non-essential mail during this pandemic, rearranging our cases so we are not working right next to each other. ...? I do not feel safe doing my job now and but need to keep working. I'm not sure how to handle this. I have spoken to a union rep but that did not seem helpful.

TRUE	03/3/20 4:28 PM		Other Agency	Essential business not follow	Other	United States Post Office	United States Post Office	2700 Caples Ave. Vancouver	Vancouver, WA	On Monday March 27th, 2020 I observed no employees in retail area enforcing quantity of people in small retail area. I saw many customers ignoring tape marks on the floor used for 6 foot social distancing and no employees enforcing that rule. People were just packed in behind each other and some were leaning up against the counter instead of 6 feet back. I was also very concerned that there were no shields at the counter to protect customers or staff. I casually asked an employee why they did not have shields and why they were not enforcing social distancing and was told "The counters were not built for shields and we all just have to deal with it". I have hardly left my home since then to see the current situation but with all that is going on with folks and businesses not observing social distancing, more people being infected and dying, I feel I must report this. As I say, two weeks ago I happened to drive by this location. This is an espresso stand but unlike most, it has seating, or did at that time and for years prior. You can see the seating in photos at their Facebook page by just googling Burton Coffee Stand. There were many people seated there, which doesn't seem right under these circumstances. Further, I believe establishments like this, with seating provided are supposed to have plumbed restrooms with handwashing facilities for patrons. I don't believe they have anything but a porta potty for employees. No handwashing facilities for those congregating patrons. Doesn't seem right! People in the stores for non essential items 7 days a week with no professional cleaning being done in the store. Shopping carts are wiped down at close of business but not at all through out the day. "Cart runs" are done by the workers throughout the day and never are the carts being wiped down before they enter the store. Workers are covering several different departments due to call outs but are asked to wipe down their departments w a diluted cleaning solution- this is not being enforced nor is it possible to wipe down two or three departments while you are working. Social distancing is not occurring near the cashier registers due to the lack of employees at the registers. Break rooms are still filled with more than 10 people. Bathrooms are not being cleaned during the day. No professional cleaning has occurred since the virus broke out. No safety screen at the paint desk where people spend over 10-20 selecting their colors and consistently leaning over the counter and touching paint counters. No sneeze guards up in the paint area as of March 31. No masks are available for the workers yet Lowe's sold them for weeks. Requesting Lowe's use more aggressive approach to cleaning throughout the day and stress to the public that this isn't the time to do home improvement tasks with daily visits to the store for non essential items. These stores are packed- lines wrapped around just for gardening and paint. This stay at home order is not being taken seriously. But why is my grooming business deemed non essential and they get handed my revenue and my clients on a silver platter while I am forced to be closed. Receiving no income and laying off groomers. It is absolutely them taking advantage of a loophole. They know it and you know it. You cannot threaten to take my business license away then turn around and allow this obscene display of disregard for directives to go unseen. I am calling on you to have a rule across the board. Either groomers are essential and continue working or ALL grooming. Including corporate are non essential. They aren't above the rules.	howlywood@hotmail.com	Hector Dominguez	253-303-2128	LICENSINGREGION2@PETCO.COM

TRUE	03/3/20 8:08 PM	AG	Eviction	Landlord	Safe Harbor Property Management	4013 S Puget Sound Ave	Tacoma, WA	My landlord sent a very inconsiderate letter to all the tenants stating that rent is still due at the normal time even with regards to the huge financial crisis we are in and people losing jobs. The letter (which I can send) was very inconsiderate. Today she text me saying that I overpaid on my rent which I did not know and I asked for a refund considering what is going on I don't have extra money to shell out right now and she said that she doesn't have the authority to issue a refund. The letter gave little to no consideration for the financial difficulties going on in the world and I feel offended that they felt that this was okay to send given what's going on. TRUE	04/01/20 6:52 AM	covid19complaints@ini.wa.gov	L&I	Business function performed	Construction	POINT RUSTON LLC	5004 MAIN STREET	TACOMA		I have read the letter that was sent to the Governor's Office from Point Ruston LLC, concerning the Superfund site. It states that some of the "physical cap that creates impermeability to the in-ground slag" is not finished... This is true for only for a very small percentage of the property. In my view it should not include the properties where the "cap" is completed. It doesn't make sense to have 100+ workers in a constructed apartment building interacting with each other just so the general contractor can try to keep his schedule, threatening subcontractors with legal action if they don't keep working... the "physical cap that creates impermeability to the in-ground slag" building foundation, walls, sidewalks and landscaping is already completed in these areas. The workers in these buildings are worth more than a greedy landlords pocketbook... don't you think? Please make the finishing of a mostly constructed apartment building or Hotel non-essential. If Point Ruston wants to continue to work on the "Cap", (which their not) they can keep those workers to do so... thanks	lelandhitchcock@gmail.com	Leland Hitchcock	2533773991

TRUE	04/01/20 8:57 AM	Nathan Kresse	L&I DOSH	Essential business not follow Other	Office supplies	Office Depot	201a East College Way	Mount Vernon	It is my understanding that Office Depot is considered an essential business because it has cleaning supplies, supports people working/school from home, and supplies necessary items to hospitals and other vital businesses. Most Office Depots are out of cleaning supplies and have been for weeks. The vital businesses that Office Depot supports do not come into the store to purchase things. They purchase online and have it delivered. A hospital is not going to come in and pick up a pallet of paper, they have it delivered. Office Depot does not let people know that we are out of the essential supplies they're looking for. Instead they encourage people to come in and browse. Sit in the many office chairs they have on display. Try out the upwards of twenty laptops that are on display. People can line up to use the self-serve copy machines, use the computers that are available to the customers to check their email. Sit in the chairs in the front lobby. The list goes on and on. Office Depot has other options. They have the ability to order online and have it picked up at the curb within an hour. Items can be shipped to your door within 48 hours. As an employee I do not feel safe. I cannot sanitize things after one customer touches it before another one does. I have no way to help keep my community safe in this environment.			3005402981

West-side staff are being actively encourage to tele-work on a full-time basis, while the East side staff, under a different Regional Administrator (RA Kristine Skipworth), are only being authorized to tele-work 2 days per week. The other 3 days per week, East side CCD staff are required to return to their usual office work station. Presently, all offender contact standards have been dramatically changed to phone-contact, in a large majority of the cases, while a very small minority of cases require a CCD officer to make a visual contact in the community (from a distance). Thus, most staff sit in a field office making telephone calls to offenders in close proximity to each other. There is no rational logic for staff to be required to make telephone calls to clients in a shared office environment does not follow Gov. Insee's order. WA-DOC's failure to comply with Gov. Insee's mandate may likely continue to encourage the spread of COVID-19 amongst WA-DOC staff. In response to Gov. Insee's mandate, CCD has implemented an Office COVID-19 screening protocol whereby staff must screen before entering a field office; however, as of Monday, March 30, many east side field office staff have failed the screening protocol and were sent home with symptoms that			509-330-1010

They're also not practicing safe social distancing guidelines, not properly cleaning the stores. Their putting their employees and customers at risk, putting profit before people. TRUE	04/01/20 11:28 AM		Other Agency	Business function performed	Construction	Seattle Department of	6934 Bellevue Ct. E	Seattle	Hi, I live next door to a Seattle Department of Construction and Inspections project (Project #3022687) at 6934 Bellevue Ct E, Seattle, WA, 98102. In the past two days, a construction crew has used a wrecking crane to destroy two houses at early morning hours to build a new dwelling apartment unit building. This is especially frustrating as these two houses were surrounded by apartment buildings with people mandated to work from home under the Washington state shelter-in-place order. Construction companies are not an essential business, and it is especially difficult to get work finished at home with all of this loud construction background noise. I was woken up this morning around 7 am. The local police are not taking noise complaints and the Seattle Department of Construction and Inspections phone line says it's "closed." How is this construction taking place? Saw their trucks out today delivering lumber packages to new construction builders that are STILL building Employees not following social distancing, there are groups of people using the handwashing sink in a small room together and no one is trying to enforce social distancing. I was there picking up a load and was asked to wash my hands before I checked in, but there was a large group of people rushing through the handwashing area. It felt like they were not taking this seriously at all. Then when I got to the check in window the office staff was sitting close together. Massage therapists not listed, occupational and physical therapist only. Employee/cashier working at the gas station advised he tested positive for Covid 19 and was coughing while checking at the counter. He had a mask but was not wearing it on his face and he said it was not a big deal because everyone will get infected sooner or later. I understand the gas station is an essential business, but seems unreasonable to have someone positive for Covid 19 actually working at it and exposing everyone there.	jack.rushall@gmail.com	Jack Rushall	7608157288

The city of Camas, WA is just now breaking ground on a non-essential infrastructure project in defiance of the Governor's Construction Guidance Order released just the other day. Local city officials are well aware of the Order and have specifically released a press release yesterday to attempt to frame the work as essential. In 18+ months of prior preliminary actions to try to get this project approved, the city has never once expressed urgency beyond this being an improvement project. The city now claims that should this work not proceed, that our intersection will "soon reach failure". This intersection allows access for the major roadway through our town, should construction block that route, thousands will be left unable to evacuate during an escalation of current conditions or other emergency. Thank you for your swift attention on this as we are concerned for the health and safety of the workers that will be pressured into doing this work in defiance of both the governor's stay home, stay healthy proclamation and the Construction Guidance Proclamation.	pw5431.city@gmail.com	Phil and Madeline Williams	3608184402

This risks exposing staff unnecessarily. A volunteer coordinator was allowed to work even though she was not feeling well because her temperature was still under 100. TRUE	04/01/20 3:19 PM		Other Agency	Business function performed	Construction	Construction	City of Camas	616 NW 4th Avenue	Camas	In a rush to spend state grant money (taxpayer funds) the City of Camas is proceeding with construction it has suddenly deemed essential in order to technically comply with the Governor's no construction order. The City is suddenly claiming the project is essential because it "will soon reach failure" which is absurd. While traffic had increased at this intersection there isn't any intellectually honest citizen who drives through this intersection (as I do several times a day) who would look the Governor in the eye and tell him it was true. The City is flipping the bird to the citizens of the City, the State and the Governor himself in playing these games. As an aside, traffic circles are designed for car traffic, not pedestrians. This intersection is at a recreational area with some of the heaviest pedestrian traffic in the City. This traffic circle will endanger pedestrians and many citizens are terrified that someone will be killed as a result. Surely, taxpayer grant money isn't intended to endanger the good citizens of Washington. So please have the Governor issue a cease and desist to the City of Camas for the traffic circle at Lake & Everett. You might have him take a look at the grant money for this project too. Very hard to believe he's support it. Thanks for your time!	kdenoya@yahoo.com	Karen DeNoya	3608333366

A14 Tacoma		Due to nature of this business it is not possible to practice social distancing. Hearing testing, video otoscopy, hearing aid fittings and programming, ear impressions and teaching clients how to put the aids in and out requires 60-90 minutes for an appointment. Providers are less than an arms length away, sometimes inches and are serving the most vulnerable population with the median age being 65+ years old. This company has multiple locations with extended hours that include weekends at their Tacoma and Gig Harbor locations. I have worked in this field for more than 12 years and currently work for HearUSA. Our offices in Washington and Oregon and in 32 other states have all been closed since Friday, March 27th at 5:00 PM.	gregoire.rochelle@gmail.com	Rochelle R. Gregoire	253-298-0967 or 243-359-5055

TRUE	04/01/20 3:54 PM		AG	Essential business not follow	Landlord	KWI, LLC	306 N Spokane St Suite 1	Post Falls	Please clarify how to deal with voluntary Residential Lease contract release? I am a college student. Due to COVID-19, finishing school and the loss of my job I went home to Montana before the Stay Home-Stay Healthy proclamation. WA, ID and MT have now implemented essential travel only with the end date looking like April 30. My lease expires April 30 and KWI pressured me to either give notice or sign month to month contract. (multiple calls daily and emails) Due to lack of employment, I chose to give notice and stay in MT. KWI is requiring I come back to Spokane to clean and vacate the apartment no later than April 30th. I would go next weekend if travel restrictions were lifted. I have already lost my income and cannot afford to pay additional rental due to the travel ban. As is, I have asked them to use my deposit towards last month's rent and they have refused. I feel they are not complying or making concessions due to COVID-19 social distancing and travel restrictions. What is the process on this? On top of that, there are far more than 50 people gathered there in one place, between the staff and the people being held in detention. It is a huge hazard, with many people sharing bathrooms and other living spaces, being brought in from other places, being deported without being properly tested, and coming to and from daily for work. The resident being tested was placed on isolation and on droplet precautions but with the door opened and the roommate was not isolated because according to the DNS and the administrator that resident was allowed to wander the halls without any restrictions and into the dining rooms just because he was not showing any signs and symptoms. However we are aware that signs and symptoms will not be shown up to 14 days of contracting the virus placing all the staff and other residents at risk of being exposed to the virus. Aside from that we were not given the proper PPE for this kind of disease outbreak, having to use garbage bags for our feet and no goggles or facehild to cover our face and even our no touch automatic hand sanitizer dispensers that were placed outside every residents room were switched to the old traditional pumping hand sanitizers in an effort to save money. On Sunday afternoon March 29th one of our coworkers (NAC) was called in to work knowing she is pregnant. That NAC then asked if there was a possible case of the virus and our scheduler (Ron) said no and said that the resident was being swabbed for pneumonia, although she was well aware of someone being tested for covid19 (and we have proof that she did know)	luis.sanchez.2015@gmail.co	Luis Sanchez	5098239371

She just called me very concerned about the safety of their operating practices. One of her patients tested positive for covid last week and was placed in hospital. My daughter was sent home with a fever. The patient is now in hospice care and my daughter has been sent back to work without testing or proper ppe. I am making this contact myself to protect her from any possible retaliation at work. She and her coworkers have been provided with a single mask each and have been told to reuse the same masks on every shift. I am sufficiently literate and well informed regarding best practices to know that this is unacceptable for this kind of business, potentially putting the safety of both staff and clients at severe risk. I hope that swift action can be taken to prevent further harm and hold those responsible to account, while at the same time safeguarding my daughter from any negative consequences of having informed me. If I do not hear back from this office in the affirmative within 24 hours I will go up the chain of command there until satisfactory action is taken. 										The reception area is tiny, approximately 4 x 6'. Petco claims that they are reducing the number of customers allowed in the grooming area, but they are not. They often have as many as five or six dogs coming in at the same time each with one or two owners. All expected to cram into that tiny space, which makes social distancing impossible.				
										The waiver form which must be signed is handed over, no gloves, who knows what is on that surface. The same pen is passed around from person to person to sign.				
										The employee restrooms are open to the public and homeless people are allowed to use it, leaving feces and used hypodermic needles all over.

CDK Construction has continued the non-essential construction work since the Governor's Order took effect for businesses on March 25. This was previously reported via this website on March 31. It is now April 2. The Woodlake Condominium's location spans the 3200-3300 blocks of 80th Ave. S.E. on Mercer Island, WA. There is no emergency at the complex. CDK Construction's work falls outside the relevant Order's exempted essential businesses work. The construction relates to exterior siding and decks. Crew continues working non-essential functions in and around the complex. The exposure includes entering resident units under reasoning that crew do not have fevers or otherwise display symptoms. Appropriately ceasing operations as required by the applicable Order protects these workers, residents, and the community.	Concerned Woodlake Resident

The employee on the phone said not really, but they could. He made it seem like it was weird for me to be asking if they did that, because he then told me that they "really only have like 4-5 people in the store at a time." (Like, as if I shouldn't be worried about coming in). Then he told me that he needed to attend to customers who were in the store. I don't understand how shopping for liquor in-store and being around other customers in such a small space as theirs is a good idea for the community; liquor is not an essential item like food. I am very disturbed by this information and he was seen out and about after returning from his trip. As you should know that the 28 students that returned from TX from Cabo also around the same time tested positive for COVID-19. I am very upset that this would be happening at all. Also, I am not happy with the fact that there are dual citizens driving back and forth over the border. I heard a younger person that I do know of, has been partying in Vancouver and coming back here. This is also unacceptable. I would like to remain anonymous regarding this complaint. State Street, 1717 S Tacoma			CHI Franciscan is mandating Human Resources, ancillary staff, support staff and others to report to work. This work can be performed in the home setting/telework, as the functions of these roles are not essential to COVID-19. Per CDC guidelines mask are being used for all staff coming into the hospital & these aren't clinical employees! This is wasting valuable supplies for essential health care staff- when there's a national shortage of masks! Staff in roles that aren't direct patient care or support are mandated to report daily. The FAC is the business office and they are mandated to report daily too. An employee at FAC has tested positive & this has subjected hundreds of people & their families to COVID 19- unnecessarily when their work could be done in respect of the stay at home mandate! This violation is going to continue to expose citizens because of the day to day travel & needs for gas etc. The daily travel for roles that are non-essential staff is increasing portals of transmission. Human Resources functions through telephone & email support to leaders, they don't provide ANY direct patient support. Nor does business staff, education, or a myriad of other roles. Why are these Washingtonians in non-essential roles being mandated under a clause because they work for a hospital?

But, my husband went to pick up an order and was shocked...they have a narrow entry way, and waiting seats along it. People were waiting inside next to each other and you had to walk right by every one of them to get your food. It was a tight little area with no way to social distance, even if you wanted to try. You had to walk by all the people waiting for orders. Plus their employees had no way to keep social distance from customers, so were exposed to each customer at the check out. And from those waiting nearest the register. They were not having dine-in, which was good. But there was no social distancing happening at all, and no option for it; so you had to risk it going by all those waiting, down the narrow entry hall to pick up your food. Perhaps people needed to wait outside, have a table and greeter at the door and then pass the order on to be delivered at the door and paid for there too.	tranymoods@comcast.net	Erin & Trey Moody	425-239-8818

Other stores are limiting the number of people. Fred Meyer is not. I believe this violates the governors orders. Fred Meyer owes it to their employees to help keep them safe! It's extra upsetting because it feels like those of us who HAVE been taking it seriously, not going out (except once a week for essentials) are going to end up stuck at home for nothing while others freely spread it! It continues to take people into detention and transfer people to the Northwest Detention Center from other parts of the country, putting all of the people and staff there at high risk of illness and death from COVID-19. It also continues to deport people, putting other countries with less developed healthcare systems at risk of more coronavirus cases. It is a travesty that this is occurring under our watch. As an American citizen I am ashamed by our approach to refugees and immigrants in our country. Having volunteered at the Northwest Detention Center I have met people there and heard very difficult stories from women seeking asylum and women who have lived in the U.S. since they were toddlers but are now at risk of deportation to a country they have never known. TRUE	04/03/20 10:39 AM	Nathan Kresse	L&J DOSH	Non-essential business is open	Other	Fabric store	JoAnn Fabrics	510 E. College Way	Mt. Vernon	I'm very concerned about a business that's still open and not practicing proper procedures. JoAnne Fabrics on College way, in Mt. Vernon is still open to the public. I just called to confirm that. Only thing they have changed is their hours. I went in to pick up material they were handing out to make masks. I was in shock when I walked in. At the cutting table, a customer (no gloves) handed the employee a plastic bolt of ribbon telling her she needed X amount of yards. The employee took the spool of ribbon - no gloves and proceeded to cut it. When I asked about the masks kits, they weren't made yet but all the materials were laying on the counter. The employee took the spool of thread, the ribbon and the material, all with bare hands, and stuffed them at the way inside a baggie - again no gloves. I picked up the baggie with my gloved hands, took it home and sanitized the baggie, microwaved the fabric and let the spool of thread sit out for 3 days before I started making masks. There were two employees behind the counter standing about 2 feet apart. Up front, at the register, there was a cashier handling money and handing the customers goods - all with no gloves. There was talk a couple weeks ago that these masks were going to be handed out outside, via curbside pickup. This is not the case with this store. I'm not only angered but very concerned because this is how the virus is spread.	betorachel@yahoo.com	Rachel Beto	(360)421-5945	customer.service@joann.com

Those who are high risk have been forced to take PTO during their "on" week - if others do not want to come into the office due to their concerns they also must take PTO or stay home without pay. We have done our own diligence in separating ourselves in the office but we have about 15 people in the building together at once with 1 restroom, all of these staff members are capable of working from home. The reasoning we have been given for this is to "maintain a presence in the office" however, there is no reason to, we support all of our users remotely as it is. This building is also a pharmacy building where sick patients use the same entrances as IT staff.		Anonymous Staff Member

TRUE	04/03/20 6:21 PM	covid19complaints@ini.wa.g	L&I	Business function performed	Construction	Charter Construction	Charter Construction	980 South Harney St	Seattle	Hello, Charter Construction is performing non-essential construction work on 1525 and 1601 Taylor Ave N (98109). They are making esthetical renovations to the apartment building. This is not due to emergency repairs or to ensure the structural integrity of the building, it's purely optional work. Also, the workers perform their work in tight spaces that put themselves and the residents within a few feet of each other. This makes social distancing virtually impossible. Many residents have asked them to postpone the renovations to align to the Governor's orders but they have denied doing so. I am unable to leave my contact information for fear of retaliation.

They Phinney Ridge Community Center posted publicly on Facebook that they sold flowers out of their garage to 90 different people in the community (Phinney Ridge) to help out a local small business owner. I don't believe the person has their own shop and may not even have a legal business license. She sells flower arrangements that you would typically see at a public market (not a professional florist). The vehicle next to them also amongst them adding another 2 to 3 people not following social distancing and making a small group right in front of the entrance of the store filled with customers and workers. We are a retirement community and would guess the full parking lot from shoppers at Home Depot will not be a good thing for our community. This needs to stop and is scary for our community. Since when is it essential to build a deck or go shopping for paint? I see a faucet or hot water tank but a parking lot full of shoppers is not right to us that are scared for our lives of this virus. This should not be happening. Something at Walmart. Most of this space controlled by metro parks, people are gathering at point defance, even with gates locked by parking by the nursing home and walking in, in large groups. The neighborhood parks have tons of people playing basketball and kids playing on the toys. The weather is only going to get nicer and I am very concerned about these beha iors.

This is occurring at the emergency department triage/registration desk on the main campus of Overlake Hospital Medical Center. I was very concerned, asked a few questions. It was extremely clear the registration employees are afraid to report their unsafe work conditions due to fear of retaliation by their employer. I know the hospital is not following current CDC guidelines, OSHA and Public Health Department policy amidst Covid 19. The employees that are registering patients are not appropriately protected. Patients are simply being asked to put on a standard mask if they feel they have respiratory virus symptoms. That is always standard protocol during any respiratory virus season or for that matter anytime of the year. No additional measures are being taken to protect those employees registering the patients. Definitely not anything even like we are seeing to protect grocery store clerks. The patients can lean over the registration desk and come within very close proximity of those registering them. Certainly at least within 2 ft. Definitely nothing like 6 ft. I am highly aware of current CDC guidelines for this EXACT situation at all hospital emergency departments. I am not actively employed. I was widowed, lost my mother and busy caring for my young daughter. However, I am actively certified by the American Society of Clinical Pathology and have 17 years of experience as a Medical Laboratory Scientist working exclusively in Infectious Disease	shannonlake22@outlook.com	Shannon Hamilton	2062265380

These tourist then tell others that the Coast is Clear and they are arriving still. It is time for LE to uphold the orders made. Otherwise, in this Age of Enlightenment, we will have more people arriving. They come to their second home or camping lots too, just because they think they can. The Stay at Home order is worthless unless it is clearly stated to stay off the beach and at your primary home. Resources, especially medical resources, are limited. This policy is extremely dangerous and can easily cause rapid and rampant spread of Coronavirus and other dangerous pathogens among frontline healthcare workers. All employees are telework-ready. At most, only one person needs to be in the office to receive deliveries; the rest should be sheltering in place because there is no logical reason for them to go in. This violation is being replicated at 4 offices—Seattle, Everett, Tacoma, and Olympia—due to one manager's egocentricity and no other reason. Employees are being told "if they do not want to come in, they are welcome to NOT work here." The offending manager's name is Leland Dart who sits in our Everett office. Both the Seattle and Everett offices were closed for the last two weeks for cleaning due to multiple positive coronavirus tests, and today employees are being sent back to those offices for no reason. All of our employees are temporary, and many of them are older retirees, so their lives are senselessly being put at risk. First I would like to say I have already called the health department and they are saying that they cant do social distancing and are replacing it with checking temperatures and looking out for symptoms in individuals. There was already a positive case of COVID 19 in the place and not only did they continue running, they didnt even shut the place down for a couple days to actually clean everything the person has touched bathrooms wherever it could be spread. Not just that they are still having everyone gather the same time same place for lunch over 70+ people, 10+ people per table. Everyone is terrified to continue working. Scared to report because they could potentially get fired. And not have a job anymore. There needs to be some boundaries between the people working a SAFE environment to work. TRUE	04/06/20 12:26 PM		No Agency	Non-essential business is open	Other	Toy Manufacturing	Funko	2802 Wetmore Ave	Everett	Funko has closed down their HQ in the midst of this pandemic. Their warehouses remain open and functional as "essential" business. They manufacture toys. There is nothing essential about it. According to the Proclamation that was implemented by the Governor, essential businesses that manufacture items are only able to do so if their products are deemed essential and are relevant to transportation or "supplies needed to support manufacturing, packaging staging and distribution operations". Packaging materials are outsourced and by far in nature they do not provide an essential product for the public. There have been two confirmed cases of employees, in particular a worker who works in the warehouse. No formal universal communication about this person infected was released - employees were informed by word of mouth. They continue to operate and are in direct violation of the states orders. They need to cease operations immediately to prevent employees from being affected. Funko should be held punatively responsible for their immoral decision to remain open.			contact@funko.com

There's cross contamination between glove uses and dont feel the establishment is clean enough. Patients can be without scheduling for their surgeries for weeks as I've heard by medical professionals that it is not "essential" considering that skin cancer is the LEAST aggressive form of cancer. I feel like they are putting their employees and patients at risk and staying opened will not help stop the spread of COVID-19. They need to shut down for the safety of employees and patients, especially the patients. There are also way more than 50 workers working in the office all whom which I hear coughing at times and I am unsure of glove changes.

All the change I have noticed is tape on the ground that encourages customers to stay 6 feet away. Been in this store a few times, and it seems just like a normal business day. Not as many contractors for construction, since they are holding off on a lot of their projects. It's a lot of people that are just staying home with nothing to do. There's been quite a handful of people coming in without any protection. Seen a few coughing and still touching items in the store. Even the paper receipts they have to hand off to the yard employees outside. It doesn't look, and feel right to only have tape on the ground to encourage distancing. A lot of lumber yards I've been hearing are either closed, or only allowing deliveries to be done. This one is freely letting anyone, and everyone from the public, come in to continue to move about anywhere with, or without protective measures.

They were standing right in front and in back of each other with no clearance at all, so the store was not following the social distancing requirements set Washington state governor Inslee! This was unacceptable, as I immediately left this Target store, not wanting to take the chance of getting the virus in these conditions that this Target was not protecting me and its customers from the coronavirus! They are claiming to be closed and it looks that way from the outside looking in and in writing, but it's actually picking up since governor Inslee extended the lockdown. More work is being scheduled pushing the limits of any gray area. Although there are some essential customers, Topline itself is not essential, that's why it's not "open" altogether. They actually are open though. Some are working from home which is allowable in the governor's proclamation but there are still measure people, installers, shop workers, and delivery teams carrying on and potentially exposing themselves, their families, communities, etc. There's been close calls but no one is sick or maybe they haven't told anyone. Some that are working are not comfortable but don't want to risk their job so they continue. It's to the point of going out to measure to places that are not safe and clearly not essential but they are defying the order themselves. Another thing is customers in Oregon are open and expecting delivery so Topline is supporting that. Is this something that someone can look into? It's not just the workers that are at risk, they have families waiting for them when they return home that are at risk too. That's the main reason for the governor's order, Stay Home-Stay Healthy. They are also taking advantage of undocumented people in the shop. It seems like they are the only ones working in the shop. Help us please. This information was given by our HR department. Currently we still work in an open office environment with staggered shifts to maintain "social distancing." However, whenever anyone walks behind someone's chair to get to their desk (which is unavoidable), they have to be within 2-3 feet of that person. TRUE	04/07/20 9:13 PM	Nathan Kresse	L&I DOSH	Essential business not follow	Other	Law firm	David J. Crouse & Associates, PLLC	422 W. Riverside Ave., Suite	Spokane	This family law firm has the capability to work from home as most law firms are doing. The owner, after arguing with employees, finally agreed to allow employees to work from home for two weeks beginning March 24, 2020. He told them, "Well I don't want a mutiny. I'll give you two weeks then you aren't getting shit." He does not limit contact with the general public. In fact, he welcomes and encourages current and new clients to come into the office. He has instructed employees not to accept service via email, which forces contact with other law firms, most of whom are working from home or have at least closed their doors to the public, therefore, endangering their health as well. There are no social distancing measures in place. They ran out of hand sanitizer and disinfecting wipes so employees are bringing their own. A request for these items was made more than a week ago but never received. Every employee has the capability to work from home, yet they feared losing their jobs if they continued to work from home, so they are putting themselves and their families at risk and going to work without any safety measures in place. The owner sent a memo to the employees informing them that if they were not comfortable coming in, he would furlough them without pay even though all of them have accrued sick and vacation pay available. He did furlough his intern, but quickly hired her back after applying for the small business loan and learning that in order to have the loan forgiven, he couldn't furlough his employees. These people strongly believe that if they take this furlough time HomeDepot is allow 100 people at one time, it is too large of gathering in stores (more than 100 people which not count employees yet).	patches543@gmail.com	Raven Robinson	509-263-2411

We're halfway through another week and if you're feeling cooped up, grab your hand sanitizer, put on a mask, stretch those legs and go for a walk. City trails and parks are open. Everyone is encouraged to maintain social distancing while using parks and chose to be smart in the way you recreate and please be mindful we are not regularly cleaning or sanitizing the surfaces of benches or playground equipment.</p> <p>Although public restrooms remain closed, we have installed porta-potties at each park—Cochrane, Longmire, and City Park, as well as the trailhead of the Yelm-Tenino trail. The company providing the porta-potties provides the necessary maintenance every Monday. It's important to note they have stopped providing hand sanitizer because it gets stolen every time... so bring your own sanitizer... which is a good idea to do anyways nowadays.</p> <p>We've had some people ask that we close all the parks, but we cannot reasonably enforce such a decision. Dog owners, families, and children are congregating here all day in large groups where some even bring lawn chairs and picnics. I do not see how this is complying with social distances. All public parks are closed off while the playground remains open. I live across the street from this playground and see people congregating all day long.

It has two communal bathrooms, each with two toilets and two showers. The place is run-down and the bathrooms are NOT clean. I inquired about covid19 plans, they stated they are not doing anything. In fact, it seems to be a joke, specifically the 6 foot distance rule. My RV does not have a working shower or toilet. I haven't finished repairs yet, so for another couple weeks I will be forced to use the communal toilet and showers. Today a large group of campers came in. I am terrified of the bathroom, I take care of my elderly mother as well so I'm bathing out of a wash-basin until I finish my plumbing. IF ONE INFECTED PERSON IS HERE, THEY WILL EXPOSE SEVERAL DOZEN OTHERS, MANY OF THE RESIDENTS HERE ARE ELDERLY AND/OR DISABLED. I have seen people playing golf, which might be good exercise but might be illegal because they charge money for it. Also, I inquired about what they are doing for rent, some people here have to be moved by May 15, but if there isn't anywhere for us to move to, considering how they been treating this as such a joke, I expect trouble. THEY ARE LETTING IN ANYBODY WHO WANTS TO RENT A SPACE. MOST OF WHOM HAVE TRAVELLED FROM ANOTHER PLACE, AND ARE SOON GOING TO BE TRAVELLING TO ANOTHER PLACE. I am disgusted with this place, I don't trust the bathrooms (the door is actually hanging bent on).			2069474660

At least 1 employees wife works at a facility where there are confirmed cases so he's been exposed potentially and is therefore potentially exposing the other employees, and in turn those employees families. My family falls into that category. I am terrified what will happen if I get this as I already have respiratory issues. Owners greed could be putting us and our healthcare system at risk of unnecessary illnesses or worse. I and many friends and family members repeatedly reported Northern Truck (previously located in Marysville/Smokey Point) as they were not working on anything essential and necessary even prior to the move. Do construction companies really NEED a new truck right now? Finally 2 reporters got responses this week that they would be investigated but it was too late because they had already moved the operation to the Snohomish facility (this move occurred just this past Friday and Saturday). No lockdown is no fun for anyone but people who don't comply make this go on longer than it needs too. It's scary out there and these people don't care about the health and well being of the general public doing this. The more they don't comply the longer we will be in lockdown. This especially applies to construction necessary to prevent "spoliation" or any damage to a structure due to inclement weather. It is the City's policy to rely on the good judgement of the building community to keep its workers safe, and to ensure that any member of the public in the vicinity of a project is likewise kept safe. In these unique times, this includes "social distancing" whenever possible, along with all other common-sense practices. With this letter I ask any official seeking to stop work on a construction site in the City of Lynden to contact me first, directly, at the numbers below. Until that conversation has taken place it is the City's policy that work continue, uninterrupted. This is the direction we have given builders working on projects in our City." The rest of our counties and state agencies need to do the same. These renters believe that the state will not enforce the law and that the tourist/road trippers can travel without any consequences and just be on vacation while disobeying the law. The residents of the Olympic peninsula may have a pandemic later this summer from these vacationers bringing their viruses to the folks up here who obey the Governor's edict which means we may get sick and die and our schools stay shut and we remain in our homes while these road trippers have a vacation . That is flat out unacceptable. Please consider having the state patrol arrest one road tripper and one vacation home operator and let the Seattle Times and all media outlets know that the Governor is serious about his edict. That will put a quick end to this madness that may very well overwhelm our hospitals in the Olympic Peninsula. PLEASE DO SOMETHING. The Governor needs to do what the Governor of Georgia did. Box 182646 Columbus, Columbus	OSU is trying to move patients with Covid 19 into fraternity houses and make the dorm custodial workers be around them. Majority of the students are gone so I don't see how dorm custodial workers are essential and now they have to clean up after covid 19 infected patients. That puts them more at risk for bringing it home to the families.

TRUE	04/10/20 3:27 PM		Other Agency	Non-essential business is open	Other	Parks and recreation	City of Tukwila Parks Dept.	12424 42nd Avenue South Tukwila	This parks department is open and requiring the 6 man crew to work full time performing most parks maintenance functions. The city of Tukwila have closed the amenities within but the parks and trails themselves are open and being heavily used. Although, All king county parks/trails are closed. All Seattle parks / trails are closed and all Kent parks /trails are closed to name a few. The crew was originally staggered, 3 on and 3 off but is now back to full resources. My husbands area of employment wasn't on the essential list as a parks maintenance worker. Is pressure washing a tennis court or mowing a parks trail truly essential right now? They do empty garbage at parks sites but are 4 - 6 weeks of letting grass and foliage go unattended really going to make a difference? Meanwhile continued grooming of trails and parks encourages patronage. My husband feels a bit unsafe but is afraid if he speaks up he'll be reprimanded. I am a RN working w/ Covid 19+ patients at isolation and quarantine sites in king county but I don't see my husbands role as essential in this environment either. I wish someone to discuss this issue w/ the city of Tukwila's Executive team. My husband was told, when he asked about it that his direct managers made an argument to the city that they were essential and they will likely qualify for 80% of their base pay as hazard pay. This all sounds like stretching benefits to me and some manipulation. It feels smarmy! Maybe you can shed some light to the situation?	Grupppoo123@comcast.net	Jennifer Engle	425-306-0595

TRUE	04/10/20 4:39 PM		No Agency	Business function performed that is non-essential	Other	Grooming Salon	Petco	31419 Pac Hwy S	Federal Way	I reported this 2 days ago. Petco is still operating the non-essential DOG GROOMING. ALL groom shops state wide are closed and deemed non-essential. If this virus is SO bad as we are being told by the media why haven't they been stopped? Not just myself but many people I know are starting to question whether this is more about controlling and destroying the little guy. I would think if it was SO severe it would have been stopped immediately before a possible asymptomatic groomer doesn't infect 7-10 people each day times how ever many groomers are in the shop because they are in contact with the asymptomatic groomer. We want off of this LOCKDOWN sooner than later and to watch big corporations not have to abide by the same rules as the common folk as Pelosi calls us. STOP PETCO from doing non-essential grooming OR open up all groom shops if the spread isn't an issue with grooming. I am contacting the media right after this second complaint if no serious action is being taken against them during this "horrible" pandemic as we are being told. Then it tells me that either the virus isn't what the local government wants us to believe and it's control or it's because I'm not a corporation donating to the coffers. If the governor is SO concerned about our safety and this is SO contagious then do something about it!!!	mawa222@comcast.net	Shirley Sybert-Bish 253-347-1913	LICENSINGREGION2@PETCO.COM

Queens Hair and Beauty supply located next door at 504 Renton Center Way SW had their Open sign on the door open and customers being greeted at the door by unmasked Workers> Unmasked Workers were also taking product to the people in cars. The sidewalk they are using is shared by the Vet. One of the workers put her hand on my back and asked if I had an order to pick up and what my name is. This took place between 1:00-3:00 PM on 4/10/2020. This business is ignoring Public Safety and put me in Jeopardy with this action. Hair salons and beauty salons are suppose to be closed. I am an essential worker in health care. I'm exposed to enough risk. The woman stated she is allowed to be open because they are delivering the wigs to cars. But on 3 occasions customers were greeted at the door. If they are allowed to be open for some reason they need to be schooled on social distancing. TRUE	04/12/20 12:03 PM	Other Agency	Large gathering(s) of people	Other	Seattle Police—failure to enforce Governor's proclamation	Seattle Police	610 Fifth Avenue	Seattle	I followed the state's protocol to report illegal gatherings to the local, non-emergency police phone number. Called Seattle P.D. yesterday because I have a "friend" who, a week ago, invited a group of people to participate in an Easter Sunday ritual (eating, drinking, singing) in the Lakeview Cemetery. This friend had conducted the ritual 35 times in past years, so I had every reason to believe they would follow through this time, too. I had tried to dissuade them with the kindest email/explanation I could conjure, and had not heard back from them. So I phoned the police the day before the planned event. I was told to deal directly with the cemetery business and that Seattle Police would do NOTHING about this—not even send a patrol car at the scheduled time of the event. They would respond only to a report of a "crime in progress." I find this an absurd abrogation of SPD's mandated responsibility under the proclamation. In effect, they will do nothing until an inevitable, illegal gathering is already underway and the damage done. I gave SPD an opportunity to intervene at the time that the event organizer was planning to be there alone (preparing the site). SPD flat-out refused and instead put the onus on me and a private business. I hope you will agree that this is NOT effective or good-faith law enforcement, and that it serves to undermine the efforts of citizens to cooperate with and follow the terms of the proclamation. If I follow Golf course is operating at full capacity. This is going on and recreational fishing is closed. First, I don't believe they are a licensed Pre-K facility. Second, while some parents are essential workers, they are inviting all preschoolers back, even from non-essential households. I'm especially upset because this appears to be a way to continue charging tuition, along with violating the stay at home order. I was not aware that lawncare was an essential business and chose not to go to work even though my employer had asked me to. I recently found out they had received a letter allowing them to work as did each worker, except for me. I have not been notified of any changes and did not receive any letters stating that I could work and received no calls, text or anything from my employer although they have continued to work. I feel that they have unjustifiably terminated my employment with them since no one has bothered to contact me and have not returned my messages or phone calls. I feel I have been treated unfairly, it's not like I refused to work for no good reason. What, if anything, can be done about this situation? Please let me know. Today, 4/12/20 at 3:45 pm there were 25 cars in this parking lot -- so many that there were cars parked in non-parking spots. There were NO signs indicating the trailhead parking was closed, and no signs saying "no parking during pandemic." On the trail itself, we observed numerous instances of different groups of people being within 1 to 2 feet of each other (no social distancing). Additionally, half of those on the trail are cycling, meaning they are breathing hard and fast -- with no masks on, while passing walkers. Scientists have already posited that cyclists and runners should keep 5 meters' distance since their breath is expiring at a much higher velocity and therefore spreading longer and farther.	sharonaz39@yahoo.com	Sharon Smith	520-548-2818

Builders are deliberately continuing to build on projects that don't meet even the Commissioner's order, much less that of the State's. The site across from our house gets to build, workers don't social distance, and they could potentially get hurt. We have 3 essential workers in our home - RN, Fred Meyer cashier, and Behavioral Health worker. We follow the rules when not being required to report to work. Why do we even bother to protect others when our officials and neighbors fail to protect us? Why do they get to grossly bend the rules? Reaching out to the Commissioner's was met with anger and dismissiveness, followed by a commissioner's meeting and continuation of building. I have pictures of multiple social distancing violations over many different days since the Governor's Order AND the Commissioner's Proclamation took effect. This is my second appeal for C&C Investments East Haven project to be halted via the Governor's office. Spokane veterans home was donated a large amount of n95 masks from the American red cross important in caring for a positive tested patient, as I do understand covid is droplet related, unless you are within one foot of a positive person. I feel that in a nursing home where a care provider is up close to a patient providing cares it is important to have a facility protect the caregiver and any patients against the spread of this covid 19 virus. This facility will not provide the n95 mask even though they have an ample amount to do so. They also are not following proper quarantine as this spreads among the facility, often patients are eating at meal times in a large group in a dining room, many residents are going up and down the hall of the quarantined area freely to a patio to smoke or gather socially. There are other doors and exits these patients can use and not be forced to go through a quarantined area. They are putting healthy residents at risk. I believe that because of this movement in the quarantined area healthy residents have been unnecessarily exposed and have now tested positive. Please contact this facility asap to ask them to follow CDC guidelines and give out masks to protect everyone including the public. Also this facility is telling staff if the test positive or have any covid 19 symptoms we are required to go to work regardless unless we have a fever. We are not allowed to call off a shift. Even worse, the owner(s) and their agents, including but not limited to "volunteers" hired by golf club management to apparently check member IDs, are approaching each person on the course face to face (within a physical proximity of inches) without wearing masks, taking IDs without wearing gloves and handing them back to each member without sanitizing. The sheer numbers of golfers in groups on the course without masks, gloves, in close proximity of each other and going into the yards/properties of homeowners on the course is astonishing and unsettling. We believe that all other courses have been closed, whether public or private, and wish we had reported this earlier. Clearly the owners/management of the Oakbrook Golf Club could care less about social distancing, the homeowners who have been long supporters of the golf course, their community, or Governor Inslee's stay home/essential business orders from March 23. TRUE	04/15/20 8:13 AM	covidenforcement@cb.wa.gov	LCB	Essential business not follow	Other	Golf Course	Othello Golf Club	2269 W Mockingbird Ln	Othello	I have complained about this before, and no action has been taken. The Othello Golf Club remains open. The state of WA does not consider golf an essential business, but no action has been taken because the game takes place outdoors. However, very, very few of the golfers who crowd this course daily practice social distancing. They crowd together at the pitches and on the greens, screaming and shouting. They stand shoulder to shoulder and high-5. They spit and hack and cough as they drive or walk only feet from residential yards. They also ride together in crowded golf carts. I have seen as many as 4 people in a single golf cart (with only 2 seats). No more than 1 person should ride in a golf cart in this pandemic, the seats are only 2-3 feet apart - yet 80% of the carts I see have 2 or more people in them actively yelling or shouting at one another - all expelling potentially harmful droplets. My main concern is that Othello is very, very windy most days and the wind blows directly from the players into my yard and open windows. I've seen players sneeze or cough without covering their mouths and have been directly down wind from them. The 6 feet of separation does not apply in windy conditions - wind can transport these potentially infectious particles much further. Othello is windy roughly 5-6 days per week.

Students and parents view this as an invitation approved by the district to gather on Friday night. As a parent of a senior I appreciate the sentiment but as a family that lost a grandmother to covid-19 last week, this is really distressing to me. They say it is just turning lights on but I know for a fact that students plan to gather as if it was a school event. This is a direct violation of the governor's stay at home order. TRUE	04/15/20 4:25 PM	Other Agency	Large gathering(s) of people	Other	Private prison	GEO Group	1623 East J Street, Tacoma, Tacoma	The Northwest Detention Center, operated by private prison company GEO group, is a non-essential business. Today marks the start of the third hunger strike at NWDC in less than two weeks. Over 400 people are on hunger strike. People detained are fighting for their lives and spelled SCOS in the yard at NWDC today with their own bodies. Continuing to detain people is profoundly immoral and a clear violation of a person's fifth amendment rights. Because of the pandemic, there is a huge risk of hundreds of people dying in custody unless ICE releases people immediately. Tolerating pandemics in prisons is a genocide tactic. GEO should stop operations, close NWDC as a non essential business, and release people detained. Both employees and people detained should return to their homes. I also urge public health officials to require GEO to provide an immediate response to specific questions about conditions at NWDC.	jasper.perryanderson@gmail.com	Jasper Perry-Anderson
